

Simplify Digital Lending for Your Bank

Hawthorn River Digital Loan Origination System is an end-to-end solution designed to meet the unique needs of community banks. The solution eliminates disjointed technologies by processing a wide range of loan types and automating manual lending processes for consumer and commercial loans—thereby providing big bank capabilities for community banks.

From car loans to commercial credits, Hawthorn River Digital Loan Origination System is engineered to simplify lending for banks and covers nearly every collateral type, including vehicles, equipment, real estate and more.

System Features, Designed for Simplicity

Stay ahead of the digital curve, improve operational efficiencies and ensure regulatory compliance with this loan origination solution. New features are designed after we collaborate with banks to determine their unique goals and objectives, ensuring that this single-point solution delivers the technology they need.
