

CSI InfoSlips

A modern approach to the traditional statement

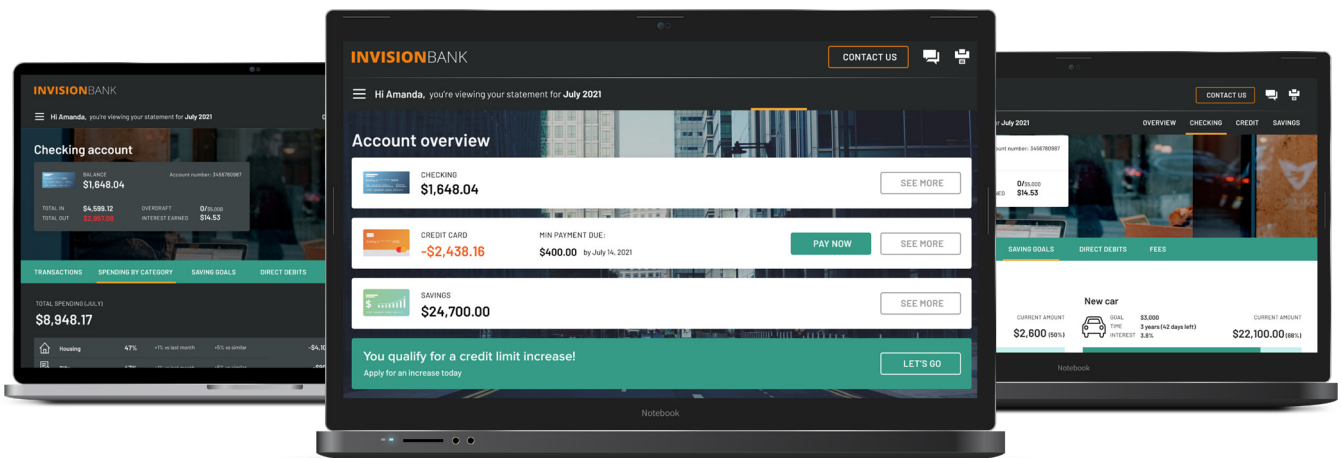

Deliver Dynamic, Personalized Documents with CSI InfoSlips

Statements are the most consistent and pivotal touchpoint with customers, so it's important you supply an exceptional experience that also boosts your bottom line. CSI InfoSlips revolutionizes digital document delivery through a sleek and interactive user experience that's coupled with a modern, open architecture that integrates directly with other applications and data.

Documents Reimagined

Transform static documents and statements into interactive experiences that drive digital engagements with your customers.

Create Meaningful Customer Engagement

Leverage interactivity and personalization to drive engagement using InfoSlips Designed Outcomes Methodology.

Compose Once, Deliver Anywhere

Meet customers in the channel of their choosing with responsive statements that can be viewed across all devices, including mobile, desktop, self-service portal and even traditional printed statements.

Produce Legally Compliant Statements of Record

Produce encrypted, legally compliant statements of record that are authenticated to ensure statements are only accessed by the intended recipient.

Collect Valuable Customer Usage Data

Understand how customers are engaging with statement content via statement usage and analytics reporting, sharing valuable data to help you better understand your customer.

Reduce Support Center Volume

Allow clients to self-help by delivering well-designed, easy-to-use, and content-rich statements, that integrate payments, reducing support center volume by as much as 28%.

Drive Digital Adoption

Deliver statements that encourage digital adoption by making the statement valuable to the customer, supplying interactive features that they can use to analyze and drill through to explore their personalized statement of record.

The Benefits of CSI Infoslips

Our digital-first platform focuses on the digital document experience and integrates into the traditional print statement, allowing you to:

- Increase deliverability to your customers
- Enhance digital engagement and open opportunities to cross-sell other products and services
- Consume and collect data from multiple sources in nearly any format
- Provide access to current and historical documents using API Integration to your website, or drive customers directly to the CSI Infoslips app or portal
- Create actionable reports and tracking that show when, where and how your customers are engaging with your documents
- Operate entirely in the cloud and include a Helpdesk portal to manage documents
