

# My Credit Manager

Credit Monitoring | Financial Education | Digital Engagement

## Remain at the Center of Your Customers' Financial Wellness with Credit Monitoring

Credit score monitoring is a critical component of consumers' financial wellness. My Credit Manager from CSI makes it easy for your customers to take charge of their credit and achieve their financial goals. Through our partnership with Array, My Credit Manager delivers a fully integrated credit monitoring solution that deepens engagement with your customers by providing them a complete picture of their finances—including credit score and history information—in a single location. Your customers also receive valuable financial education, empowering them to understand how financial actions affect their credit.

## The Need for Credit Score Awareness

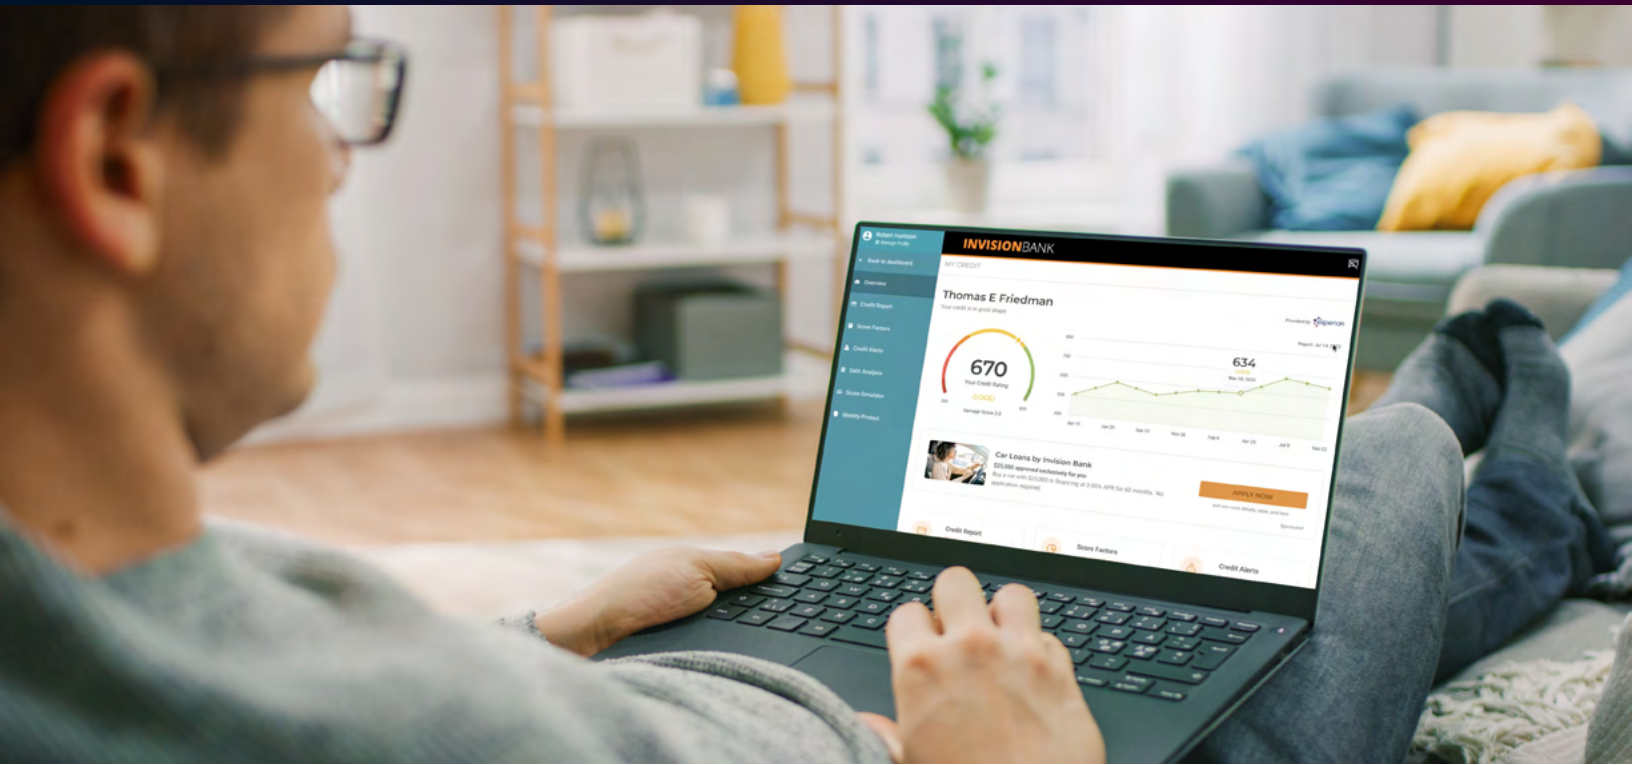

A recent consumer credit health survey from Discover found that 82% of respondents checked their credit score at least once annually and 56% are actively trying to improve their credit. But many consumers rely on resources outside their bank for credit monitoring because their institution lacks access to that information. This poses a real opportunity for banks to deepen customer engagement and increase retention while serving as a trusted advisor at the center of their customers' financial health.

My Credit Manager gives customers a 360-degree financial view within your digital banking solution. From assets and debts to credit score and history reports, this fully integrated and secure credit monitoring solution supports users on their path to financial wellness.

### With My Credit Manager, you can:

- ✓ Deepen customer engagement
- ✓ Increase customer acquisition and retention
- ✓ Empower credit health education
- ✓ Maintain security

## Key Features That Provide a Complete Credit Picture

Assist customers on their journey to financial health by providing the right tools and features from My Credit Manager.

### CREDIT SCORE

Show customers their credit score from one or more credit bureaus. With the credit score tracker, your customers can see how their score changes over time.

### CREDIT REPORT

With 24/7 credit report access, customers can keep track of inquiries, open lines of credit and more, while keeping their credit in good standing.

### CREDIT SCORE SIMULATOR

Show customers how their score is affected by certain actions, such as opening a new credit card or taking out a loan.

### DEBT ANALYSIS

Let customers view and manage all debt in one location through your digital banking solution.

### CHANGE ALERTS

Enable customer notifications for credit score or report changes, so they always have accurate information.

### CREDIT EDUCATION

Help customers learn how to manage their credit score and keep it in good standing.
